CHEMLUBE® 226
SYNTHETIC HIGH TEMPERATURE CHAIN LUBRICANT

Applications:

Chemlube 226 is a fully synthetic fluid designed for use as a high temperature, polymer-free chain lubricant with an organic molybdenum compound to give superior wear protection. This premium chain oil has the advantage of being easily applied through a mister or atomizer type lubricators due to its viscosity grade. Chemlube 226 gives extended life in the temperature range of -20°F to 500°F and will reduce carbon, gum or sludge deposits. It also has a low evaporation rate making it last longer and has outstanding wetting and spreading properties. With these properties, Chemlube 226 yields savings in maintenance dollars.

Typical Industrial Applications:

 Conveyors
 Lateral Chain Belts
 Tunnel / Lap / Tray Ovens
 Cam
 Bearings
 High Speed Can Lines
 Lithographic Chains
 Oven Slides & Gears
 Conveyor Roller Ball Bearing Chains
 Gypsum Board Processing
 Fiberglass Processing
 Wood Processing
 Coating Ovens Automotive Industry

Performance Benefits:

 Superior resistance to wear
 High degree of high temperature corrosion-oxidation stability
 Reduced maintenance cost & cleanliness
 Natural detergency eliminates deposits
 Superior lubricity provides an end to chain kinking or shortening
