

CHEMLUBE® CF32 & CF46 CENTRIFUGAL COMPRESSOR LUBRICANTS

Applications:

The Chemlube CF32 and CF46 are formulated with the highest quality polyalphaolefin (PAO) base oils. These 100% premium synthetic oils are designed for use in centrifugal compressors. The carefully designed additive package in Chemlube CF oils provide anti-wear properties to protect the bull gears which operate at 1200-3600 RPM. At the same time, the Chemlube CF oils lubricate and protect the high speed (30,000-50,000 RPM) impeller bearings. Chemlube CF oils have been used successfully for many years in large and small centrifugal compressors. They offer a service life of 12,000 hours in centrifugal compressors in good operating conditions.

Typical Industrial Applications:

- Centrifugal Compressors

Performance Benefits:

- Energy savings – generally 3-5%
- Greatly extended oil change intervals (5X petroleum)
 - ✓ Less downtime for maintenance
 - ✓ Reduced waste oil disposal cost
- Eliminates or reduces varnish and shellac on critical component surfaces
- Increased thermal and oxidative stability over petroleum oils
- High flash point helps reduce fire hazards
- Gearboxes run cooler due to reduced friction
- Excellent anti-wear additives
- Wide operating temperature range and high viscosity index
