ULTRACHEM ANNOUNCES COMPLETE LINE OF REFRIGERATION OILS

Ultrachem has developed a complete line of premium refrigeration oils for commercial and industrial refrigeration systems. Our premium refrigeration lubricants provide protection against wear, resist water contamination, and reduce carbon and varnish buildup. Any refrigeration lubricant must be compatible with the type of refrigerant in the system. Ultrachem's wide range of products will cover just about any type of refrigerant in use today.

Whether its mineral oil, Poly Alfa Olefin (PAO), Polyolester (POE), or Alkyl-Benzine (AB), Ultrachem has you covered. Contact sales@ultracheminc.com or visit us on the web at www.ultracheminc.com for more information.
