

VPS3 SERIES SYNTHETIC VACUUM PUMP LUBRICANTS

Applications:

The "VPS3" Series are fully synthetic lubricants for high performance in vacuum pump service. The "VPS3" Series utilizes the latest technology available in combination with excellent lubricant additive systems to provide the performance of a full synthetic at a lower cost. The "VPS3" Series is made from a severely hydro-treated, hydro-cracked hydrocarbon base fluid.

32S is designed for Liquid Ring vacuum pump designs.

46S and 68S are designed for rotary screw vacuum pumps and yield a service life of 6-8,000 hours at a wide range of temperatures with good operating conditions.

68S and 100S are designed for rotary vane vacuum pump designs, and they yield a service life of 3-4,000 hours in vane units.

100S and 150S are designed for rotary piston vacuum pump designs, and yield a service life of 4-6000 hours.

Typical Industrial Applications:

- Liquid Ring Vacuum Pumps
- Rotary Screw Vacuum Pumps
- Rotary Vane Vacuum Pumps
- Rotary Piston Vacuum Pumps

Performance Benefits:

- Excellent vapor pressure with low volatility
- Effective rust protection
- Excellent demulsibility
- Good thermal stability
- Superior wear protection
